Education

K.J. Somaiya College of Engineering

B.Tech in Computer Engineering

Coursework: DSA, Algorithms, OS, OOP, CA, Web Development

Jul 2023 – May 2027

CGPA: 9.5

Experience

MyEzz

Full Stack Developer Intern

Nov 2025 – Feb 2026

- Built and optimized features for a production food delivery platform serving real users.
- Developed secure frontend-backend workflows using REST APIs and database integrations.
- Improved application performance and reliability through systematic debugging and optimization.

Credence HR Services

Research Intern

May 2025 – July 2025

- Built comprehensive onboarding workflows for **InductX**, a virtual employee onboarding platform.
- Integrated PlayFab-based gamification for tracking employee progress and engagement.
- Designed HR-aligned onboarding journeys through research-driven planning and collaboration.

WE DISTRICT

Full Stack Developer Intern

Dec 2025 - Jan 2026

- Built and deployed the NGO's full-stack website using modern web technologies and Supabase.
- Optimized website design and improved application latency speed by 40% through performance enhancements.
- Developed secure backend integrations, database workflows, and responsive frontend interfaces.

Projects

Syncifi

Tech: Next.js, React, Prisma, Supabase, Google APIs

Demo

- Built an AI-assisted productivity platform that syncs Gmail emails with Google Calendar workflows.
- Developed queue-based approval systems for extracting and managing deadlines from emails.
- Implemented duplicate prevention, dismissal persistence, and secure OAuth-based authentication flows.

ZeroPlate

Tech: Next.js, React, Firebase

Demo

- Built a food waste management platform with real-time analytics and NGO coordination.
- Implemented location-based NGO discovery using geolocation APIs for efficient redistribution.
- Integrated voice-based feedback to improve accessibility and student engagement.

PawPal

Tech: MERN Stack, Razorpay

Demo

- Built a pet adoption platform with role-based dashboards for users and animal shelters.
- Integrated Razorpay for secure donations and adoption fee processing.
- Developed pet listing workflows with advanced filtering and application tracking.

Achievements

- Secured AIR 697 in ICPC 2025 Prelims and qualified for the ICPC Asia West Regionals.
- Achieved AIR 250 among 320 teams at the ICPC Asia West Regional Contest 2025.
- CodeChef 3-Star (Max Rating: 1605)

Profile

Skills

Languages: C++, C, Java, JavaScript, Python

Technologies: React, Next.js, Node.js, MongoDB, Firebase, Supabase

Tools: Git, GitHub, Docker, VS Code
